di Scienze Matematiche  
G.L. Lagrange

DIPARTIMENTO  
DI MATEMATICA  
GIUSEPPE PEANO  
UNIVERSITÀ DI TORINO

**Friday 18 June 2021 - 14:30**

Online webinar on the Zoom platform  
[http://tiny.cc/crypto\\_webinar](http://tiny.cc/crypto_webinar)

**Guglielmo Morgari**  
**Telsy**

**IOTA and the TANGLE**

**Abstract:** IOTA is an original distributed ledger implementation. Unlike the more well-known blockchains, IOTA is designed specifically for the IoT world. IOTA is in fact based on an innovative structure (TANGLE) designed for applications characterized by a high number of transactions by devices with limited computing capacity, not suitable for traditional blockchains. The talk will give an overview of the main aspects of the TANGLE and its possible evolutions.
