A Blockchain Hour: Monero's World

Abstract: Blockchain is a versatile technology that has gained great importance and spread during these last years. From cryptocurrencies to digital notary, the applications of blockchain concern a multitude of different areas. Several protocols have been developed for blockchains and several cryptographic tools have been used as well. In this talk, we focus in particular on a cryptocurrency - Monero - which just celebrated its eight-year anniversary. In particular, we will explore the cryptographic fundamentals of its protocol, giving an overview of its main features.
